

Dixie Red

It had to happen! Over the past years, Dixie has received many emails and phone calls concerning what we use to clean and maintain our test guns. The answer has been Dixie Red. It is Dixie's modification of Ed Harris Ed's Red. Now we have Dixie Red for sale to our customers!

- (1) It removes plastic residue left by plastic wads and sabots in barrels!*
- (2) It removes powder fouling and reduces leading with regular use!*
- (3) It is ideal for cleaning hard deposits from the gas systems of semi-auto rifle and shotguns!*
- (4) It is an ideal cleaner for all internal parts in firearms.*
- (5) It is ideal to remove residue from choke tubes and forcing cones.*

We even use it to clean caked on deposits on our gas stoves! Dixie Red should not be used on plastic stocks or stock finish.

Dixie Red can remain on cleaned surfaces and in the barrels, however barrels should be wiped out before firing. Shake well before using.
